Professional Summary

Frontend Engineer with 4 years of experience building Enterprise SaaS applications using React, TypeScript, and Next.js. Experienced in owning end-to-end frontend development, designing scalable user interfaces, defining API contracts, and building configurable, reusable architectures for multi-tenant platforms. Passionate about creating maintainable frontend systems through Micro-Frontend architecture, Design Systems, and feature-based engineering while collaborating closely with Product, Design, and Backend teams.

Professional Experience

Avathon | Frontend Developer

Jan 2025 – Present, Bengaluru, India

- Own the end-to-end frontend development of the Global Trade Management (GTM) platform, building the product from the ground up and leading implementation across Product Master, Tariff Classification, Bulk Classification, BOM, Reports, and Settings modules.
- Design scalable trade compliance workflows while driving new capabilities including AI-assisted Product Classification and ECCN Classification.
- Partner with Product Managers, UX Designers, and Backend Engineers to define frontend architecture, design API contracts, and deliver configurable solutions for evolving business requirements.
- Contribute to the organization's Micro-Frontend platform using Webpack Module Federation, defining scalable module integration patterns and shared application architecture.
- Architect and maintain a feature-based frontend architecture using custom hooks, API abstraction layers, validation schemas, shared utilities, and centralized state management.
- Build configuration-drive and feature-flag-based workflows that enable customer-specific customization, backward compatibility, and rapid feature delivery with minimal code changes.
- Maintain and extend the Storybook-based Design System, review shared UI component pull requests, and collaborate on frontend engineering standards and production issue resolution across React and Node.js services.

PwC India | Frontend Developer

Jul 2022 – Dec 2024, Bengaluru, India

- Developed enterprise web applications using React, Next.js, and Tailwind CSS for client-facing digital solutions
- Built reusable UI components and frontend utilities that improved consistency and accelerated feature development across applications.
- Improved application performance using Web Workers, lazy loading, memoization, and optimized React rendering strategies.
- Collaborated with cross-functional teams throughout design, implementation, testing, deployment, and participated in code reviews and frontend architecture discussions.

Key Products

Global Trade Management Platform | React, TypeScript, Module Federation, Tailwind CSS, Ag-Grid, REST APIs

- Built an Enterprise SaaS platform supporting Product Master, Tariff Classification, Bulk Classification, BOM Management, Reporting, and Settings through scalable, configurable workflows.
- Developed data-intensive interfaces using Ag Grid, implementing bulk operations, complex filtering, validation, and business-rule-driven workflows.

- Designed frontend architecture to support **rapid business changes, configurable workflows, and AI-assisted compliance experiences.**

Omnichannel Platform | ReactJS, Redux, TypeScript

- Developed an **AI-assisted analytics platform** that transformed uploaded datasets into **interactive dashboards** and **conversational insights**.
- Built **real-time visualizations**, optimized frontend responsiveness, and implemented scalable state management using **Redux**.

Skills

Languages: TypeScript, JavaScript (ES6+), Python.

Frontend: React 18, Next.js, Redux Toolkit, React Query, Tailwind CSS, HTML5, CSS3, Ag Grid, Webpack, Module Federation, Vite.

Architecture: Micro Frontends, Design Systems, Component Libraries, REST APIs, API Contract Design, Feature-Based Architecture, Multi-Tenant Applications, RBAC, Feature Flags, Performance Optimization.

Backend: Node.js, Express.js, MongoDB, PostgreSQL, Redis.

Tools: Docker, Git, Storybook, Jest, Playwright, Postman, GitHub Actions.

Education

National Institute of Technology Karnataka (NITK), Surathkal

Bachelor's in Electrical and Electronics Engineering

Jul 2018 – Apr 2022
